

WMD[®] GUNS

Performance and
coated products
to optimize the
shooter's experience.

2022 CATALOG

A NOTE FROM WMD'S PRESIDENT

With this 2022 catalog, we're excited to celebrate the beginning of our second decade of operation. Our vision back in 2011 was to bring the best high-technology surface treatments to the firearms sector and enhance the shooters' experience. Our success is measured by the growth and recognition of NiB-X® as the premier firearms coating available today. Professionals competitive shooters, manufacturers, hunters and recreational shooters everywhere are enjoying the benefits that our technologies provide.

We continue to expand our product lines with more parts, assemblies, calibers, and platforms. You'll also be seeing some new coating technologies emerge from our lab in 2022. We are incorporating ambidextrous products into our entire Beast® and Chassis® lines; we are offering a full spectrum of colored accent kits, incorporated new calibers in our upper assemblies; released the patented SlingStock® and are introducing drop-on Glock compatible slides and barrels in 2022—all of which serve to showcase the widest spectrum of coating technologies in the industry.

I want to personally thank our loyal customers for supporting us for the past decade; and welcome new customers who are now enjoying our performance coated products. As we come out of the pandemic as a nation, I hope that you and your families enjoy a happy, healthy, robust year in 2022. Happy shooting...and stay in touch through our website and social media accounts. We love to hear from customers and receive pictures of your builds!

Wynn Atterbury
President, WMD Guns

OUR LATEST INNOVATION G17 & G19 SLIDES AND BARRELS

GIVE YOUR GEN 3 GLOCK® A LOOK THAT'S ALL YOUR OWN WITH OUR CUSTOMIZED COMPONENTS.

Precision cuts along the slides completely transform the style of the Glock—while reducing weight.

For an even more impressive touch, add one of our barrels (available in a variety of coatings and finishes), plus a matching thread protector... and the result is a Glock like no other.

Our exclusive NiB-X® coating on all of these parts resists corrosion and wear, and makes cleanup fast and easy.

WMD'S BEAST® **FEROCIOUSLY TOUGH INSIDE AND OUT**

WMD charged into the firearms field with our original Beast®—the first AR fully protected by our proprietary NiB-X® nickel boron coating process.

Since then, the pack has steadily grown to include both forged and billet versions of **The Beast**, **The Big Beast** AR-10, as well as **The AMBI Beast** (with fully ambidextrous controls) and ultra-compact **Micro Beast** pistol variants*.

WMD's Beast: excels anywhere...and available any way that suits your mission.

AVAILABLE IN:

.223/5.56mm
.224 Valkyrie
.300 AAC Blackout
6.5 Grendel Type II
6.8 SPC
7.62 x 39mm
.350 Legend
.450 BM
.458 SOCOM
.308/7.62x51mm
6.5 Creedmor

PRECISION FEATURES INCLUDE:

- NiB-X coated billet or forged receiver sets
- NiB-X coated BCG and 2-stage trigger
- 16" match grade barrel fully coated for durability, long lasting accuracy and heat dissipation
- Free-float handguard
- Optic-ready Picatinny rails
- NiB-X coated gas block with Nitromet™ gas tube
- Variety of muzzle devices to meet specific needs
- NiB-X coated charging handle
- Six-position, ergonomic buttstock
- Ships with two 30-rd mags

UPPER ASSEMBLIES

Ideal for a build-out or an upgrade, WMD's upper assembly is available in either billet or forged construction. Whichever you choose, all components are fully protected by our exclusive NiB-X and Nitromet surface treatments.

**MULTIPLE M-LOK
HANDGUARD
CONFIGURATIONS
AVAILABLE**

Multiple styles,
lengths, and finishes.

THREE-PIECE SETS

These sets ensure that your project has a fully matching upper, lower, and handguard—still giving you the freedom to select other key components. WMD also gives you choices to build your AR your way, with options for rugged billet metal construction, colored accents, and even fully ambidextrous controls.

THE ULTIMATE CHASSIS® **WE STARTED IT.** **YOU FINISH IT.**

**AVAILABLE IN
MULTIPLE CALIBERS
AS INVENTORY
ALLOWS.**

WMD has taken an innovative step in our mission to make sure you have the exact gun you want. We now provide you with the renowned Beast AR-platform rifle in a ready-to-finish chassis form.

Get the same precision, performance coated components featured in WMD's Beast rifles (upper & lower receivers, BCG, fire control group, barrel & gas tube, charging handle), then finish it out with your own furniture, sights, and accessories.

The result is an affordable, a one-of-a-kind rifle that's *exactly the way you want it.*

LOWER PARTS KITS

WMD parts kits equip you for a buildout or upgrade, or enable you to conveniently secure a complete set of spare parts, so you're always ready.

And remember: these are the *only* kits on the market featuring WMD's proprietary NiB-X nickel boron coating technology.

AVAILABLE KITS INCLUDE: AR-15 | .308

MOD 2 (NiB-X)

MOD 3 (NITROMET)

ACCENT BUILD KITS*

Who says the "black rifle" has to be *all* black? WMD offers an entire line of parts kits in a remarkable range of colors, still featuring our unsurpassed NiB-X coated parts. These kits conveniently enable you to add distinctive color accents to your rifle, making it uniquely your own.

Aztec Teal

Black Cherry

Corvette Yellow

Polar Blue

USMC Red

Gold

Plus many other available colors!

THIS IS THE **BCG** that others are imitating.

Only WMD's BCG is engineered specifically for our proprietary NiB-X nickel boron coating. This produces an industry-leading BCG that resists fouling, needs practically no lubrication, and can be cleaned with the quick wipe of a cloth.

Unfortunately, some shooters are discovering that not all nickel boron is created equal when they purchase knock-offs that fail to perform to WMD standards.

WMD's BCG stands apart from all others in the marketplace. You can see the quality in the polished, presentation-grade sheen of our BCG. You can feel it in the permanently lubricious surfaces. And you can experience it as you fire thousands of rounds between cleaning without malfunctions.

Visit the WMD website to learn more about our unique NiB-X BCG—and how to guard against fraudulent imitators.

STANDARD CALIBERS INCLUDE:

.223/5.56mm*	7.62x39mm
.224 Valkyrie	.308/7.62x51mm
6.5 Grendel Type II	9mm
6.8 SPC	.450 BM/.458 SOCOM

*Rated for full-auto service.

Standard finishes include NiB-X polished, matte, or black — as well as a range of custom colors.

BARRELS

All WMD barrels start with hammer-forged, match-grade blanks. The bores are all processed with our proprietary Nitromet to harden the bore and maintain barrel accuracy 30% longer than chrome. Barrels are finished in your choice of Nitromet (QPQ black) or NiB-X for added durability and heat dissipation.

Select the length to match your favorite rifle, the profile, gas system, and twist...and look forward to many thousands of rounds of extraordinary performance.

A perfect complement to your WMD BCG, all these barrels include NiB-X-coated barrel extensions to ensure smooth locking and unlocking with the bolt.

AVAILABLE CALIBERS: Include

9mm
.204 Ruger
.223/5.56mm
6.5 Creedmoor
6.5 Grendel Type II
.300 BO
.308/7.62x51mm
.350 Legend
7.62 x 39mm
.450 BM

AVAILABLE LENGTHS: (depending upon caliber)

5
5.5
7.5
10.5
16
16.5
18
20

MISCELLANEOUS PARTS

Upgrade your AR with many of the same top-quality, American-made parts we use in our line of Beast rifles.

All our components are made in the USA to OEM-grade tolerances. WMD's exclusive NiB-X nickel boron coating helps any part resist friction, wear, and fouling. Select parts available in other finishes, including Nitride/Nitromet and colored topcoats. See our website for the full line.

	Bolt Assemblies		Ejection Port Covers		Ambidextrous Charging Handles
	Barrel Extensions		Firing Pins		Stripped Uppers
	Bolt Carrier Assemblies, Full Auto M4/M16		Forward Assists		Milspec Triggers
	Buffer Tubes		Gas Blocks .750", .875", and .936" Diameters		Nitromet Gas Tubes (C,M,R)
	Cam Pins		Gas Keys		Lower Parts Kits
	NiB-X Charging Handles		Hammers Semi-Auto		Muzzle Devices (Flash Hiders, Brakes, Compensators)
	Disconnects		Magazines		Two-Stage Drop-In Triggers

(Please note that some parts may best be installed by a qualified gunsmith.)

LAW ENFORCEMENT

WMD is always ready to put our production capabilities to work for law enforcement and military personnel. We have supported a variety of federal, state, and local agencies with rifles and pistols that are uniquely suited to withstand the elements (and the rigors of public safety usage) with minimal maintenance. We are even fully licensed to export hardware to authorized departments overseas.

AMONG THE WMD PRODUCTS TAILORED TO LE:

- The All-Environment Patrol Rifle
- SlingStock®—the first AR stock with a built-in retractable sling that instantly adjusts for any operator, any garments. (opposite page)
- SBRs for Special Ops

**CONTACT US TO DISCUSS
YOUR TEAM'S SPECIFIC NEEDS**

SLINGSTOCK®

Contains 7 feet of retractable, Type III Class 1 webbing.

OUT OF THE WAY... UNTIL IT'S NEEDED.

ORIGINAL EQUIPMENT MANUFACTURERS

WMD is a pioneer in nickel boron firearm coating, and many OEMs now turn to WMD to gain the advantage of our exclusive NiB-X coating on their own products. If you're a manufacturer, WMD is ready to be your full-service resource for surface-finishing engineering and production. At WMD Guns, we combine our arsenal of coating technologies with a systems approach to materials, performance, and quality. Call us to learn how our comprehensive firearms coating services can impact the development, production, and marketing of your guns.

Expert collaboration with OEMs on both conventional and proprietary coatings (NiB-X/Nickel Boron, Nitromet/Nitrocarborizing, Nickel Teflon, decorative ceramics, etc.)

**BEWARE OF
IMITATIONS**

DEMAND NiBX[®]

A word of caution as the industry recognizes and pursues the value of nickel boron on firearms: Not all nickel borons are the same, and not all applicators are competent. Our NiB-X is a proprietary coating that is expertly applied and guaranteed for life. We've seen many issues from customers who used substandard plating applicators and ended up with either a nickel boron that chipped or flaked, or a coating that was not even nickel boron!
